Subject: NWPPC 20 yr. contract

Steve Wright,

What hope the powers that be in BPA and NWPPC may resort to the help of wind power and invest the money needed to restore the 140 miles of the lower Snake River to save salmon?

(Dams are damn bad if you are a fish. Ha!)

It will be a miracle if concerns to protect our environment win out over profit motives these days. Good intentions may get compromised?

What is the source of power that has not been provided by BPA?*The letter I got says you accounted for "almost half"

Thank you for your kind time

.Best wishes
