Dear Mr. Steven Wright

My name is Sally Gallegos. I am the wife of and daughter of two Alcoa Intalco Works employees. Some could say that as such I should be thankful that my husband missed by a few short numbers being laid-off and my father didn't get forced into early retirement last year with the shut down of their plant operations. Truth be told I was thankful at least for a little while. These days I am just plain scared. More scared now than the last time Alcoa's future was hanging by a thread, because this time all involved are aware of our nations economical crisis. Our unstable economy combined with our states high unemployment rate, our state will no doubt be adversely affected maybe beyond repair. We can't let these plants shut down. I know my my families will be devastated. I know personally many families who would be affected by financial devastation as well. So I am begging you please, please, aid us in a resolution which would save our state, our aluminium industry and help slow down our economies slump, not just benefit a few select rate payers.

Thank-You for your time,
Sally Gallegos
