Subject: Clean Energy & Wild Salmon

9/16/02

Dear BPA Administrator Steve Wright,

I would like to comment on your planning for the future of Northwest power.

I believe we can have clean energy and enhance our salmon runs by eliminating the four dams on the lower Snake River as suggested by the RAND corporation report. Certainly we can implement energy conservations savings and develop clean energy alternatives like wind and solar power. This should be the focus of the BPA.

Sincerely,

Pam Negri & Ted Forsberg
