Mr. Jeff Stier
Acting Manager, Fish and Wildlife Division
Bonneville Power Administration
P.O. Box 3621
Portland, Oregon 97208

Dear Mr. Stier:

On February 14, 2017 the Council confirmed additional findings of the O&M Subcommittee regarding mission critical items that were identified during the last three hatchery visits.

As you may recall, at the January's Council meeting several mission critical elements were confirmed and sent to Bonneville for implementation. Also in January the remaining site visits were conducted and the following mission critical elements were found.

Sherman Hatchery, Project #1991-047-00	WDFW	Sanitary Lift Station Pumps	\$20,000
		Emergency Generator and Xfr Switch	\$40,000

Addressing these critical elements found during the hatchery assessment site visits provides a jump start in addressing a high priority item from the Council's 2014 Program using the \$200,000 requested from the cost savings workgroup. These items are "shelf ready" and can be addressed in Fiscal Year 2017. It is understood there are other mission critical elements, but additional evaluation by facility managers and engineers are needed before clearly identified actions can occur.

The Council would like to thank Bonneville staff and the engineering firms associated with this phase of the O&M Strategic Plan and look forward to working with you to ensure the continued success can be made as we develop and implement the O&M Strategic Plan for the Program.

Sincerely,

Signed T. Grover/2-16/2017

Tony Grover
Director, Fish and Wildlife Division
