Subject: Public Interest Proposal

I am writing in support of the Public Interest Proposal that you have the opportunity to adopt. The public has successfully conserved when asked to and our awareness of energy usage is always increasing as is the demand for energy itself. Very much with your support.

Please act in the public interest and increase the use and encourage public use of renewable energy resources such as wind, solar and conservation. The intention should be to stabilize and eventually restore the irreplaceable wild salmon runs and natural habitat. You have the opportunity now to act with the future generations in mind and lead the way in the most innovative and pioneering manner.

I urge you to act responsibly and invest in renewable energy resources and future technology in the public interest. Thank you.

Sincerely,

Michelle Raymond
