Hi Mark,

I personally would like to see 20% of the grid supplied by Renewables by 2020. I use photovoltaic power at my Tacoma home and have been able to slow my energy consumption over the past few years. It seems that is what happens to a family when we are producing power from the sun. Conservation is the first step to energy independence using Solar Photovoltaic Power.

I have daily energy production in Watt Hours from my Dual-Axis Solar Tracking System for the past three years from my home in Tacoma, Washington. I'm available to help you in any way I can.

Respectfully Yours,
Richard Thompson
